PREMIUM METALLIC LAMINATES

IMPOSSIBLE POSSIBILITIES

VENTURA

Premium Architectural Surfaces

Since 1994

Ventura International Pvt. Ltd. was conceived in 1994 and is today one of the leading importer of an exclusive range of premium interior and exterior decorative architectural products sourced from across the globe.

Ventura is an exclusive country partner of leading international manufacturers of luxury architectural products such as Metallic Laminates, Architectural Laminates, Decorative Planks, Exterior Cladding, Veneers, Organically Coloured Wood Fibre Boards, 3d Wall Panels, Acrylic Glass Panels, Faux Leather Elements & Panels, Innovative Fixing Systems, Adhesives and many more path breaking products from Germany, Italy, Spain, USA, Portugal and Turkey.

METLAM is an extensive range of more than 50 real metal surface laminates manufactured by Dekodur, Germany, the world's first metal laminate producer. The METLAM Premium Metallic Laminates feature decors that range in look from classic to modern, from exquisite to vintage, from rugged to delicate - every one of them in the same high standard of quality.

Metal

(from Greek μέταλλον métallon, "mine, quarry, metal")

A brief chronology of Metals

Metal is a material that, when freshly prepared, polished, or fractured, shows a lustrous appearance, and conducts electricity and heat relatively well. Metals are typically malleable (they can be hammered into thin sheets or can be drawn into wires).

Metals account for about two thirds of all the elements and about 24% of the mass of the planet. They are all around us in such forms as steel structures, copper wires, aluminum foil, and gold jewelry. Metals are widely used because of their properties: strength, ductility, high melting point, thermal and electrical conductivity, and toughness.

Transforming metal from the deep underground into the Décor in your homes

The Evolution of Metlam

Metal, one of the most significant achievements of prehistoric times that shaped civilizations over the years, is more than the object of which human existence thrives today. Discovering newer ways to use metal in creating works of art, has been a fascination for man. In order to satiate the same creativity, Ventura brings you METLAM, the harmony of metals in the form of laminates between these covers. Manufactured by Dekodur, Germany, the world's first metal laminate producer and is exclusively marketed in India by Ventura International Pvt Ltd.

This mesmerizing range of Premium Metallic Laminates comprises of metal surfaces like Aluminium, Copper, Zinn (Tin or Pewter) and Iron (Magnetic Laminates) embossed and hand crafted in a range of finishes from Brushed to Mirror to Impressions to Geometric which are inspired from a wide range of natural and man made phenomena.

ALUMINIUM

A MULTIFACETED METAL

The name aluminium is derived from the word alumine, an obsolete term for alumina, a naturally occurring oxide of aluminium. Alumine was borrowed from French, which in turn derived it from alumen, the classical Latin name for alum, the mineral from which it was collected. The Latin word alumen stems from the Proto-Indo-European root alu- meaning "bitter" or "beer".

Aluminium is the most abundant metal element in the Earth's crust. The lightness, strength, and corrosion resistance of aluminum are important considerations in its application. Metallic aluminium is used in transportation, packaging such as beverage cans, building construction, electrical applications, and other products.

COPPER

THE ANCIENT METAL

Copper was one of the first metals ever extracted and used by humans, and it has made vital contributions to sustaining and improving society since the dawn of civilization. Copper was first used in coins and ornaments starting about 8000 B.C., and at about 5500 B.C., copper tools helped civilization emerge from the Stone Age.

Even today, copper remains in high demand and offers near endless recycle-ability. Natural antimicrobial properties of copper and the unique warm colour of a metal that changes over time, copper is the perfect companion to today's lifestyle.

ZINN

THE EVER YOUTH METAL

Zinn is a German occupational name, which means someone who works with Tin or Pewter.

Pewter is a malleable metal alloy consisting of tin (85-99%), antimony (approximately 5-10%), copper (2%), bismuth, and sometimes silver. The word pewter is probably a variation of the word spelter, a term for zinc alloys.

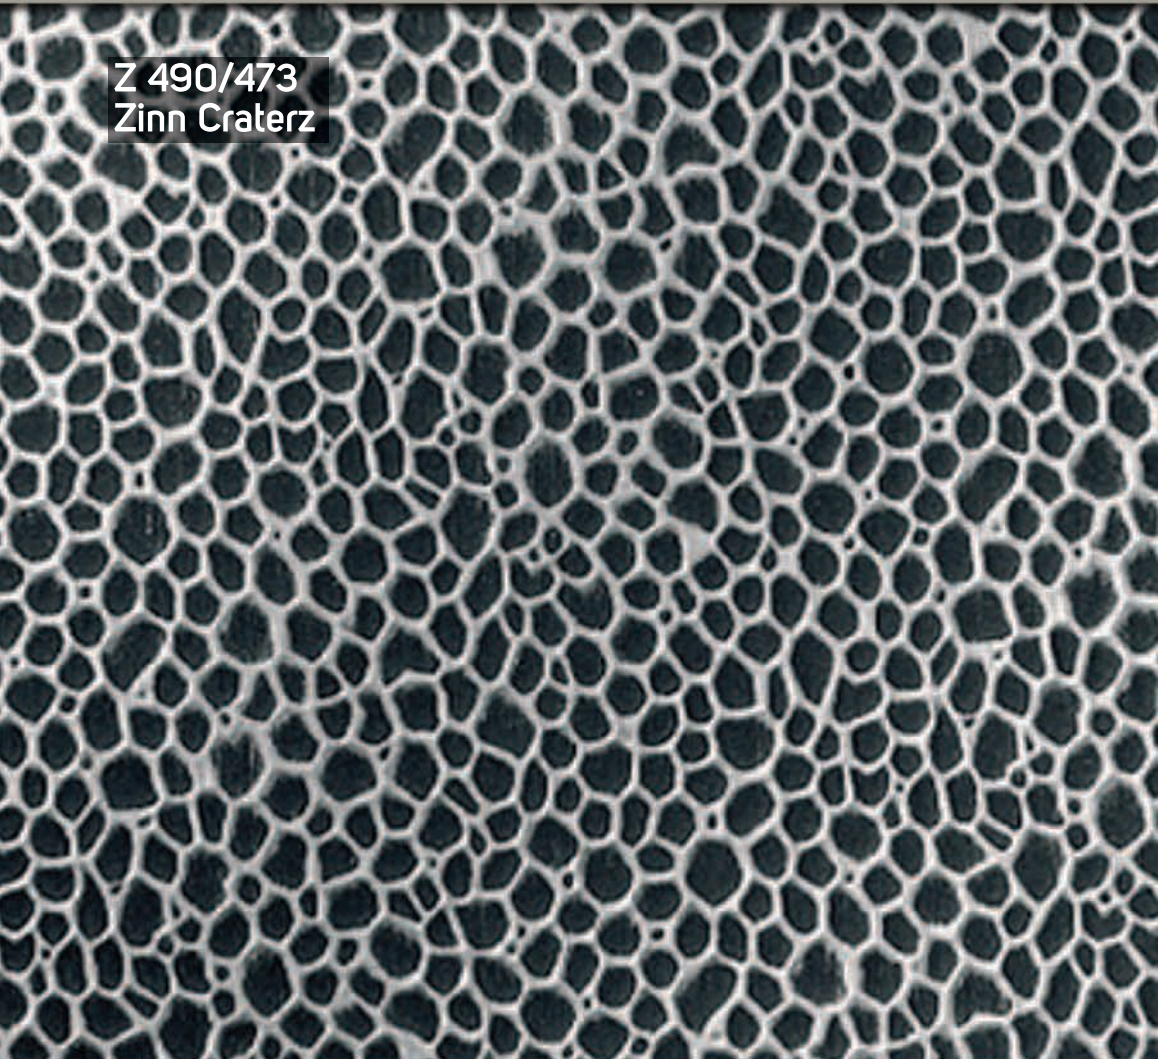

Pewter is the fourth precious metal in the world besides platinum, gold and silver. Pewter will never deteriorate over even rust. Therefore, the ancient people had used pewter since Bronze Age.
